

## ANGELS OF WAR

Veterans program: ANGELS OF WAR is our NEW VISION. It is an equine assisted therapy program to serve the needs of veterans who are struggling with the symptoms of PTSD, veterans who have suffered combat stress, hazing trauma, and encourages healing of physical and emotional trauma. Not only does our program consist of horse therapy, it is also a place for workforce and serene relaxation for our veterans. Each moment of this process facilitates positive changes in behavior. Also, increased insight often arises quickly and have a lasting transferable effect. They served and protected us and our country so please help us promote and support our equine assisted activities for them. Our program is for troops active, reserve, and retired military personnel who have been injured in the line of duty. We are honored to give back to them! Our mission is to empower, enrich, and educate through horses. Through the gentling and ground training activities, horses and human began to build honest communication, understanding and a relationship based on respect and trust.. Currently our goal for 2015 is to raise money for Angels of War so we can develop this Equine therapy program which will be our proven way of helping soldiers release themselves and start to feel whole again. So please go to our website and DONATE TODAY!!!
